

# Guide to Grants *in the* Affordable Care Act

*Office of*  
U.S. Senator  
Michael Bennet  
of Colorado

2011

October 20, 2011

Dear Friend,

The Affordable Care Act (ACA) is a significant step forward in improving health care access, quality and affordability in our country. The ACA closes insurance loopholes, expands coverage, and invests in the future of our health care workforce. The new law also provides groundbreaking opportunities for innovation and research through pilot projects, grants, and workforce development initiatives.

We have already seen the value of investing in promising pilot projects so that we can scale up the ones that work. The Community-Based Care Transitions Program based on work in Grand Junction and Denver builds on how Colorado has achieved higher-quality care at a lower cost by investing in better coordinated and patient-centered care. This pilot has already saved Medicare hundreds of millions of dollars and decreased hospital readmissions.

The best ideas do not come from Washington; they come from people on the ground in Colorado. That is why we have put together this document – to make sure you have clear, easy-to-find, accurate information on the pilot projects, grants, and workforce development initiatives available to you through the ACA.

While not intended to be exhaustive, this document includes a directory of departments and offices in charge of administering the programs, and is organized by Title of the ACA. Included are details providing grant descriptions, application timelines, most recent funding, eligibility criteria and information on grant recipients from Colorado. When available, you will also find Catalog of Federal Domestic Assistance (CFDA) numbers, which are used by Federal assistance programs to identify the specific grant, along with a website to learn more information or apply for the specific grant. When you see the term, *subject to appropriations*, it means that funding has been authorized, but further Congressional action is still necessary to ensure its future availability.

It is my hope that this document will help Colorado companies, institutions, organizations, and individuals that are eligible to apply for these opportunities. These kinds of investments will help Colorado continue to drive improvements to our health care system.

Sincerely,

A handwritten signature in blue ink, appearing to read "Michael F. Bennet".

Michael F. Bennet  
U.S. Senator
